

ABSTRACTS FROM UFO-NYT 1983, no. 6.

The following abstracts of original Danish articles in UFO-NYT are provided to our foreign readers by request of the International Committee for UFO Research (ICUR).

Kim Møller Hansen: UFO Classic - Antonio Villas Boas, 1957, p. 34-37.

In the series of UFO classics Kim M. Hansen this time deals with the Boas case from 1957. Both his initial sighting on October the 5th as well as his following close encounter of the "worst kind" on October the 15th. On this occasion he was seduced by an alleged space woman.

Two recent comments on the case are referenced. Åge Skjelborg tries in the Danish book "På sporet af UFOnauten" ("On the Track of the UFOnaut", 1979) to evaluate the Boas case in a psychological and sociological framework. In his opinion Boas had a sexual fantasy caused by lack of sleep and Boas' situation living as a bachelor together with two married brothers.

In 1978 Villas Boas was interviewed on a Brazilian TV-show (CUFOS obtained a video copy). Boas still sticks to his original story and by now he is a lawyer and happily married.

Willy Wegner: The Scandinavian Ghost Rockets of 1946, p. 38-43.

Willy Wegner describes the ghost rockets haunting the Nordic counties in 1946. Most of the rockets were seen over Sweden but this article place the emphasis on the sightings made in Denmark. Besides Denmark and Sweden observations of mysterious rockets were reported from Greece and Switzerland.

The theory that the ghost rockets originated from the postwar experiments by the Russian in the occupied German town Peenemünde is mentioned. The Russian should according to this theory with help from the German have been experimenting with the leftover of V1 and V2 rockets and a new secret V4 bomb. The author thinks this is a plausible explanation to most of the many rocket sightings in 1946, though some UFOs may still be found among the sightings.
